Per Susan Clewis, TCEQ management decided to collect one more complaint sample because the woman is in the hospital and dirty water was reported at her home Zone 3 (I do not have more detail). Waiting to hear back if she thinks this is the last one.

Let's resume our metric report out. We will have to postpone our final report. Brandi and Eric- can you determine the context of why these samples were collected and if there will be any more.

updates?

We were going to start compiling all the final data packages and get them ready to load them into the DB when you are ready for us to finalize it.

FYI. The new samples are in the database without coordinates. I asked Travis to send me the field data sheets so I can fill in the missing information.

Subject: Corpus Christi Water Complaint Spreadsheet - January 2, 2017

On January 2, 2017, TCEQ responded to one complaint with symptoms possibly related to using the water. Two samples were collected and will be delivered to the Houston EPA Laboratory on January 3, 2017.

Thank you,
Travis Prater
